LeetCode

Professional Summary

Backend-focused Computer Science undergraduate skilled in Java, Spring Boot, REST APIs, and Data Structures & Algorithms. Experienced in building scalable backend systems with authentication, database management, and clean architecture principles. Strong problem-solving ability with interest in cloud technologies and scalable application development. Solved 500+ DSA problems on LeetCode and competitive coding platforms.

Education

Bachelor of Technology in Information Technology

GL Bajaj Institute Of Technology And Management

2023 – Present

CGPA: 8.46/10.0

Senior Secondary Education (ISC Board)

Class XII

2023

Percentage: 90.84%

Secondary Education (ICSE Board)

Class X

2021

Percentage: 90.25%

Technical Skills

- **Languages:** Java, SQL
- **Frameworks & Backend:** Spring Boot, Hibernate, JPA, JDBC, REST APIs
- **Database:** MySQL
- **Core CS:** Data Structures & Algorithms, OOP, DBMS
- **Tools:** Git, GitHub, Postman, IntelliJ IDEA, VS Code, Eclipse

Core Competencies

- Object-Oriented Programming
- Data Structures & Algorithms
- REST API Development
- Database Management
- Problem Solving
- Backend Development
- SDLC
- Debugging & Testing
- Team Collaboration

Internship Experience

Java Development Intern

Brainwave Matrix Solution

Sep 2024 – Oct 2024

Remote

- Developed backend applications using Java and OOP principles
- Worked on debugging, API integration, and real-world problem-solving
- Optimized code to improve performance and efficiency
- Applied problem-solving skills to enhance application functionality

Projects

AI Based Smart Hire

— AI-Based Candidate Job Matching System

GitHub

2026

- Java — Spring Boot — Spring Data JPA — FastAPI — MySQL — REST APIs — JWT
- Developed a scalable Spring Boot microservices backend for an AI-powered recruitment platform, enabling intelligent candidate-job matching based on skill analysis.
- Designed and implemented secure RESTful APIs for authentication, job management, candidate profiles, and job applications, integrating MySQL using Spring Data JPA.
- Built resume upload and AI-driven candidate ranking features by extracting candidate skills and calculating job match percentages to improve hiring efficiency.
- Containerized the application using Docker and adopted a modular microservices architecture, ensuring scalability, maintainability, and simplified deployment.

URL Shortener

— Scalable URL Shortening Platform

GitHub

2025

- Tech Stack: Spring Boot — MySQL — REST APIs
- Developed a scalable URL shortening platform enabling efficient creation, storage, and management of shortened links through RESTful APIs.
- Implemented Base62 encoding and custom alias support to generate compact, unique short URLs while preventing collisions.
- Built URL redirection, expiration management, and click analytics features to track link usage and manage link lifecycle effectively.
- Containerized the application using Docker and Docker Compose, ensuring consistent deployment, portability, and simplified environment setup.

Certifications

- Spring Boot Course Certification – Udemy (2026)
- Java and Problem Solving – Coursera (2025)
- Object Oriented Programming Using Java – CodSoft (2024)
- Accenture – Data Analytics and Visualization Job Simulation

Achievements & Extra-Curricular Activities

- Solved 500+ DSA problems on LeetCode and competitive coding platforms
- Participant – Smart India Hackathon (SIH) 2025
- 5th Position: Hackstasy Hackathon 2024 (SRM Institute, Ghaziabad)
